COMMENTS FROM EXPERTS	
<p>Catherine Peyre, MD</p> <p>"EXPERT Progressive represents a true advancement in multifocal contact lenses. It delivers a smooth progression of powers, including a progressive intermediate. There is no image jump, even for stronger adds. Thanks to the Slab Off technology on the lower edge, the comfort on the eye is equivalent to a concentric multifocal lens."</p>	
<p>Brooke Messer, OD, SLS:</p> <p>"This new lens is easy to fit and provides the patient with wide fields of near and distance vision. It is well designed to provide excellent intermediate vision. My presbyopic patients are thrilled with the results."</p>
