

# MOONLENS™

BY KATT DESIGN GROUP

## INTRODUCING THE LATEST ADVANCEMENT IN MODERN MYOPIA MANAGEMENT

*Overnight Orthokeratology Lens System*

### IS YOUR PRACTICE READY?

By 2050, nearly 50% of the world's population will suffer from myopia\*

### MOONLENS IS THE ANSWER

- Safe, healthy vision correction option without glasses, daytime contacts or surgery
- Unique Ortho K lens design to prescribe to a wider range of patients
- Accelerated fitting reduces chair time

From children to adults, your patients can sleep their way to clear vision with MOONLENS

MYOPIA MANAGEMENT MADE EASY

ARTOPTICAL.COM

# NO TWO PATIENTS ARE ALIKE... TREAT OPTIMALLY WITH MORE CUSTOMIZATION

Created by Ortho K pioneers and lens design experts at KATT Design Group, MOONLENS is uniquely designed with a proprietary algorithm allowing more customization to optimize fitting for each individual patient eye.

- Multi-customization features improve sagittal depth, alignment zone and toricity for better stability, centration and comfort
  - Up to -5.00D myopia correction
  - 1.50D astigmatism correction
- Designed for high first fit success with micro-customization in 1 micron steps
- Convenient online calculator for efficient parameter selection
